TECHNOLOGY
FROM FUTURE

Plasma creates a better future.

About Us

We are the pioneers in the field of cold plasma. Our innovative and patented plasma equipment provides solutions for skin, hair care, infection and wound care, medical health and animal health. We are committed to making the world a better place through our innovations. We cooperate with Japan, South Korea, Turkey and the United States to provide research and application of plasma technology

PRODUCT PORTFOLIO

A story about plasma products

We are proud to have presented plasma products in the fields of aesthetics and dermatology since 2017. We have promoted the research and application of plasma in these fields, enhancing skin health and advancing plasma beauty treatments. Fusion Plasma, Cold ARC, Hot Plasma, Cold Mark, Cold Skin, Plasma Pen. These devices provide the high standards of the beauty industry and provide innovative solutions for our users.

FUSION PLASMA

Fusion plasma is a unique combination of cold plasma and hot plasma technology in one system. Its unique technology ionizes argon or helium to produce different plasmas.

Cold plasma (30°C - 70°C), which provides anti-bacterial, anti-inflammatory properties, and does not cause thermal damage due to the thermal reaction effects of heat.

Warm plasma (120°C - 400°C) stimulates collagen regeneration, skin firming and rejuvenation.

FUSION PLASMA

It is a new multifunctional skin and scalp treatment solution. By promoting collagen production, it reduces fine lines, improves texture, increases product absorption, etc. At the same time in hair treatment, it stimulates hair follicles, promotes hair growth and prevents hair loss, making them particularly effective for hair loss, etc.

- In addition, fusion plasma has antibacterial and anti-inflammatory benefits, helping control infection, wound and burn healing and ensuring a sterile treatment area. It also supports skin firmness and anti-aging, addressing collagen and elastin synthesis in sagging skin, making it ideal for comprehensive skin and scalp health care.

JET PLASMA BEAM

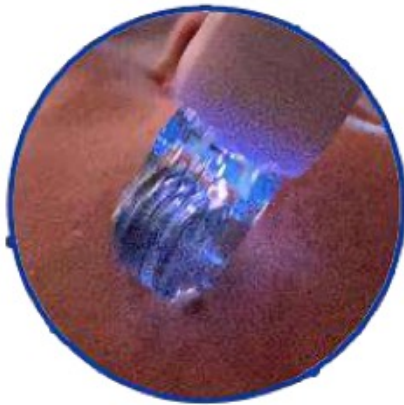

It is specifically formulated to treat skin infections and problem skin healing. It works by delivering targeted ion energy to stabilize the skin surface, making it very effective for conditions such as vitiligo, non-cholesterol infections, and active acne. The antimicrobial properties of the spray ion beam help reduce inflammation, control the spread of infection, and accelerate the skin's natural healing and regeneration process.

- These regimens are ideal for specialized dermatology and aesthetic treatments where rapid and effective infection control is essential.

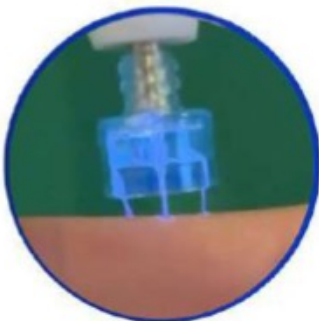

FUSION COLD TIP

Super plasma needle roller

Plasma needle roller

Uses: Highly efficient introduction, skin rejuvenation, wrinkle reduction. These tips are used in conjunction with cold plasma to renew the skin's surface and are effective in treating sunspots, age spots, cellulite, stretch marks and scars.

Uses: Highly efficient introduction, skin rejuvenation, wrinkle reduction. These tips are used in conjunction with cold plasma to renew the skin's surface and are effective in treating sunspots, age spots, cellulite, stretch marks and scars.

Flake Plasmar

Uses: Addresses scalp health issues including dandruff and inflammation while creating an optimal environment for hair growth. It is used to activate hair follicles at the root during scalp treatments.

It is also used in the treatment of cellulite in an effort to tighten the tissue beneath the skin and reduce the appearance of cellulite. This tip helps smooth the skin's surface, improve blood circulation, and enhance tissue firmness in the affected area.

Jet plasma

HOT TIP OF NUCLEAR FUSION

Straight / curved needle

The needles are fine-gauge needles that promote skin rejuvenation and wrinkle reduction by stimulating collagen production. They are also effective in reducing acne scars, burn scars, tightening atrophic skin, and improving skin elasticity.

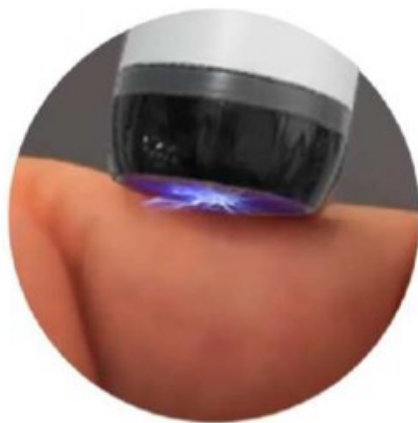

HOT TIP OF NUCLEAR FUSION

Diamond Needle

Specially formulated to improve skin elasticity and tightening. They are ideal for treating sagging skin, enhancing firmness and rejuvenating the skin, providing a smoother and more youthful face. They are used for neck and eyelid lifts and facial skin tightening treatments.

Ceramic plasma

Ceramic Plasma

Opening the fur also allows for better access to the product's active ingredients, while disinfecting the skin and scalp, helping to heal wounds and promote faster healing. It is effective in treating fungal infections and acne by disinfecting the skin and accelerating regeneration.

Product data, inspection data, safety approvals PLASMA

This data sheet is a tool to help you gather information on fusion plasma equipment

Main Features	
Product Description	Cold plasma device
Product Name	Fusion plasma instrument
Year of production	2025
type	FP-01
Valve control	automatic
frequency	50 Hz
Voltage	220V AC
power	42 W

The product working environment is 23 degrees Celsius with good ventilation. The equipment has a 1-year international working guarantee. Environmental parts (mobile phone, hand, etc.) are not guaranteed.
