

FOUR-IN-ONE

Rotary Negative Pressure RF Machine
+ Inner ball rollrt Machine

Face Handle

Body Swirl Handle

Body Roller Handle

Facial Roller Handle

Indications

- Body Contouring: Create beautiful body curves
- Skin Lift: Lifts sagging facial/body skin
- Skin Tightening: Tightens sagging facial/body skin
- Stimulate blood circulation: unblocks meridians and promotes blood circulation
- Promote detoxification: flush toxins and relax the body and mind
- Removing cold and warming the womb: warming the womb and improving cold and dampness

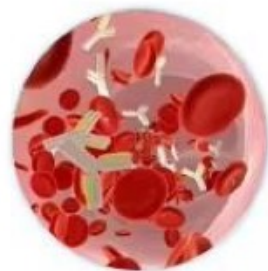

Body Contouring

Skin Lifting

Skin Tightening

Relaxes the muscles
and activates the blood

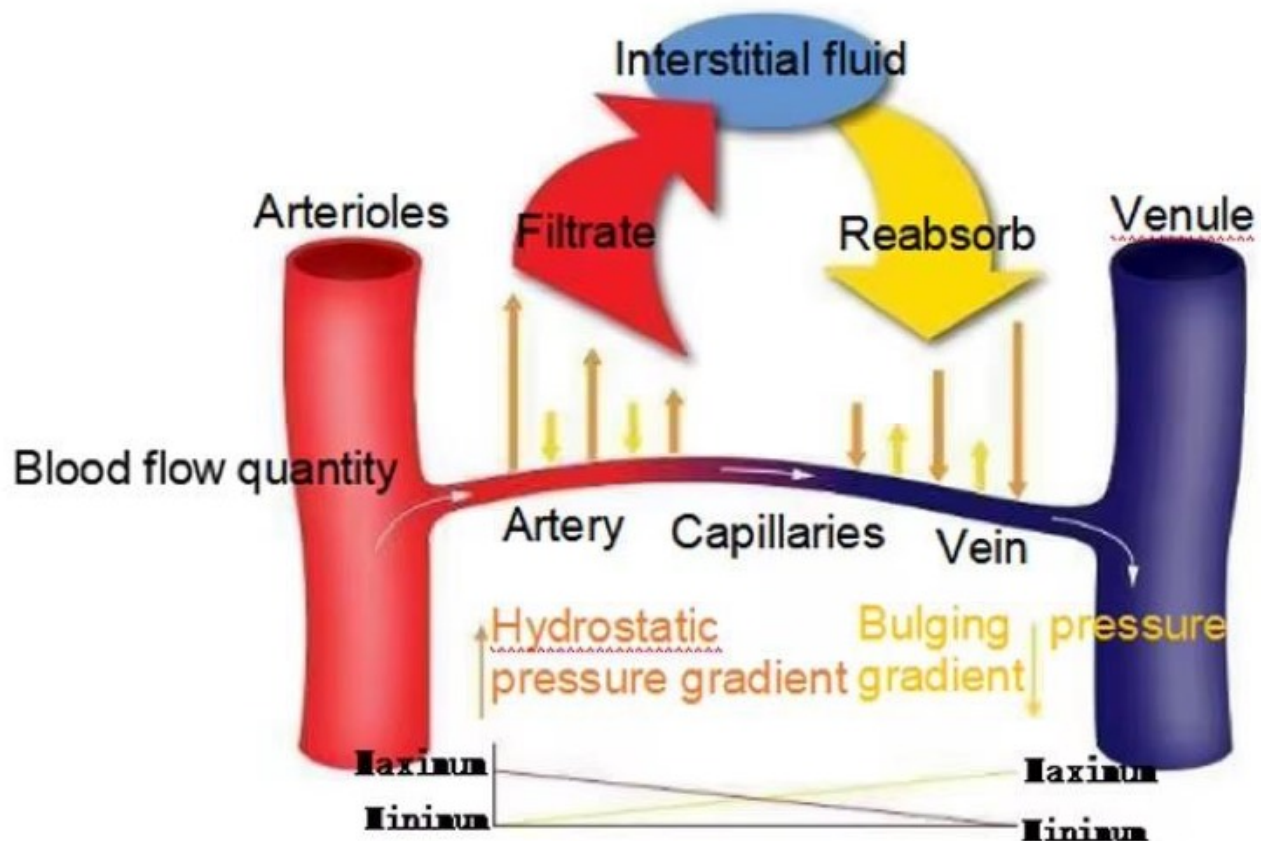

Promote
detoxification

Removing cold and
warming the womb

Inner ball roller Machine- Five Collaboration effects

Physiology of capillary circulation

ascular effect

The balance between hydrostatic pressure and bulging pressure usually allows fluid and nutrients to flow from the arterial side, and fluid and catabolites to re-enter the venous side. The increase in hydrostatic pressure is due to the slowing down of venous outflow, which results in water stagnation in the extracellular fluid, forming edema inside the tissue matrix.

Due to the special arrangement of the spheres, they are in a honeycomb shape, through pressure and lifting movements to obtain gradual tissue compression, achieving the effect of vascular exercise.

The "compression microvibration" therapy allows us to balance the hydrostatic pressure of the veins by reversing the internal metabolism and hemodynamic exchange mechanism.

Technology Core

6MHz RF

The RF energy heats cellulite, removes fat deposits, and stimulates the contraction of collagen fibers for better blood flow to all tissues, folds and wrinkles are smoothed, and bags under the eyes and areas of loose skin, including the chin area, disappear.

Real-time
Temperature
Control

Preset the target temperature before treatment, always control the temperature at the set temperature, and monitor and display it in real time. Adjustable 42-45° C constant temperature. The sub-cutaneous tissue reaches 65-70° C, precisely melting fat.

Vacuum Negative
Pressure

The RF energy heats cellulite, removes fat deposits, and stimulates the contraction of collagen fibers for better blood flow to all tissues, folds and wrinkles are smoothed, and bags under the eyes and areas of loose skin, including the chin area, disappear.

180° Rotation and
Tweaking

The RF energy heats cellulite, removes fat deposits, and stimulates the contraction of collagen fibers for better blood flow to all tissues, folds and wrinkles are smoothed, and bags under the eyes and areas of loose skin, including the chin area, disappear.

Technology
Core

The RF energy heats cellulite, removes fat deposits, and stimulates the contraction of collagen fibers for better blood flow to all tissues, folds and wrinkles are smoothed, and bags under the eyes and areas of loose skin, including the chin area, disappear.

Advantage

Dual Interface Design

The body handle has a 5-inch color touch screen, and the face handle has a 2.8-inch color touch screen, which is more intuitive and easy to control and adjust parameters.

Intelligent Temperature Control System

Set the target temperature of the skin before treatment, and always keep the temperature at the set temperature, which can effectively avoid tissue damage.

Patented Liposuction Handle

Ergonomically designed, with excellent grip and convenient operation, it makes the beautician feel more relaxed and less prone to fatigue and strain.

Real-time Temperature Detection System

Real-time control of output energy, real-time detection of skin temperature, real-time display of skin temperature during treatment, safe and efficient.

Non-invasive

There is no recovery period, and you can do whatever you want, without affecting your normal work and life.

Safe & Efficient

Purely physical, no damage to the skin, the best and deepest effect.

Long-term Effects

Long-lasting, after treatment, the skin will improve every day due to the continuous production of new collagen. And will achieve more significant and satisfactory results in about 4-6 months.

Comfortable Labor-saving Convenient

The treatment process is more comfortable, just like manual liposuction to deal with cellulite, which greatly reduces the pain of treatment.

Product Show

Accessories

Face Handle

2.8 Inch Touch Screen

- The facial handle combines vacuum and radio frequency heating to achieve focused heating and precise lifting of the epidermis, dermis and subcutaneous tissue, effectively anti-wrinkle, firm and lift your skin.

Body Swirl Handle

5 Inch Touch Screen

- The liposuction handle combines the four technologies of vacuum negative pressure, 6MHz RF, 180° mechanical rotation, and LED red and blue dual lights to suck, knead, and rotate skin fat to achieve the effect of fat melting and body shaping.

Swivel Head - Large

Suitable for waist, abdomen, thighs, back.

Swivel Head - Small

Suitable for arms and calves.
