ULTRALIFT MPT HIFU

- FACE LIFTING
- WRINKLE REMOVAL
- BODY SLIMMING

SUSPENDED VERTICAL PLASTIC ANTI-AGING SYSTEM

HOW DOES IT WORK?

THE WORKING PRINCIPLE OF THE MANTIS KNIFE INSTRUMENT

MMFU (MACRO&MICRO FOCUSEDULTRASOUND) refers to "macroscopic and microscopic high-energy focused ultrasound".

The "wave system" is a non surgical treatment for facial enhancement, tightening, and body contour shaping system. The depth can be adjusted according to different skin types and treatment sites to treat the dermis and subcutaneous adipose layer. Generate synergistic effects by simultaneously outputting energy through focused ultrasound. Energy synchronously penetrates the inner and outer layers of the skin without damaging the epidermal layer, resulting in significant pain and redness.

Layered anti-aging

Two types of treatment heads with different depths can achieve SMAS fascia layer and shallow fascia layer, with accurate stratification and anti-aging of the dermis

STEREOSCOPIC ANTI-AGING

Ultra Booster Handpiece

B-1.5

B-3.0

B-4.5

The world's first circular "micropulse ultrasound" collaborative technology for circular hand tools, ultra-sonic linear lattice focusing, can maximize the operating effect; in addition to improving, it also brings an additional sense of tightness; multiple modes can effectively reduce pain compared to traditional ultra-sound modes.
